

Chapter 4.2.4: Schools, Recreational Areas, and Places of Worship

This chapter identifies whether the Project would result in adverse impacts on schools, recreational facilities, or places of worship. There are no schools, school properties, or places of worship on or adjacent to the Project site; therefore, further analysis of potential impacts to such facilities is not necessary.

The Project site is predominantly located on private property encompassed within Letchworth State Park and adjacent vacant rural land; a small area of parkland is also included as part of the Project site. Letchworth State Park includes a variety of recreational resources. Detailed analysis of the potential impacts of the Project on the park and its recreational facilities is provided in Chapter 4.4.12, "Parks and Recreational Resources."
